

UP TO **25** YEARS
Warranty

TILESTAR BERMUDA

Strong | Versatile | Durable

TILESTAR BERMUDA

is a horizontal roof and wall panel system designed with 2 different ridge cap profiles to choose from thus creating a look ranging from modern design to Japanese inspired architecture. Its dramatic shadow line perfectly conveys the welcoming ambiance of Bermuda-style architecture. And with our proprietary textured stone coating technology, it's a perfect alternative to stone-chip coated roof at half the cost. Tilestar Bermuda can be installed over vertical framing, thus eliminating the need for additional hat channel framing.

- Akzo Nobel advanced durable paint systems make Tilestar Bermuda last longer than any longspan roofing
- No piercing of sheets greatly reduces possibility of leaks and rust formation around screws
- Concealed fastening hides screw heads
- Available in 0.50 and 0.60 mm.
- Available in a wide range of modern colors

Excellent Color. Excellent Protection.

TILESTAR BERMUDA

PAINT SPECIFICATIONS

Flexikote® 1000 (5 yrs. color retention warranty)

SPECIFIED PARAMETERS

Physical properties of the coating:

Film Thickness (ASTM D1005)	5-7 microns for primer 15 - 20 microns for Flexikote® 1000
Specular Gloss (ASTM D523)	25 - 80 %
Hardness (ASTM D3363)	F minimum - Faber Castell Pencil
Cross-Hatch Adhesion (ASTM D3359)	No Removal
Bend Adhesion (ASTM D4145)	No loss of adhesion
Humidity Resistance (ASTM D2247)	1000 hours: Pass - actual performance varies with pre-treatment and substrate
Salt Spray Resistance (ASTM B117)	1000 hours: Pass - actual performance varies with pre-treatment and substrate
Weatherometer Test (ASTM D822)	2000 hours; No checking, blistering or adhesion loss
Color Change (ASTM D2244)	For a period of 5 years delta E not exceed: 8 units - light colour 10 units - intermediate colour 15 units - dark colour
Chalking Resistance (ASTM D4214, Method A)	No chalking greater than #8
Exterior Weathering (ASTM D4141)	Very good exterior performance in Alunga and South Florida test exposures

PRODUCT COMPOSITION

Flexikote® 1000 are made from high quality weather resistant pigments in a wide range of colors. ISO 9001 certified Akzo Nobel manufacturing methods used in our Columbus, Ohio headquarter facility., uniformly distribute pigments into a proprietary polyester resin that has proven, under years of harsh 45°C South Florida exposure, to resist changes in color and general appearance, and to preserve film integrity and coating properties

Base Metal	Cold rolled high grade steel
Zinc Aluminum coating	Lock forming quality galvanizing that meets ASTM, JIS and PNS Quality Standard
Color Coating	AKZO NOBEL propriety high durable FLEXIKOTE® 1000 paint system that surpass 200 hours salt-spray-test (5 years color retention warranty) Also available in FLEXIKOTE® 5000 (10 yrs), SILKOTE® (15 yrs), TRINAR® (25yrs)
Total Coated Thickness	Available in 0.50 & 0.60 mm
Roof Pitch	Minimum of 20° roof slope
Length	Can be supplied in any length up to transportable limits
Application	Ideal for residential, resorts and clubhouses
